### **Magliner Heavy Duty Powered Stair Climbing Hand Trucks**

Standish, MI -- Magline, Inc., manufacturer of innovative material handling equipment, has added Heavy Duty Powered Stair Climbing Hand Trucks to the family of powered products. The powered stair climbing hand trucks allow operators to easily transport heavy loads up and down stairs, minimizing awkward movements and reducing risk of injury.

The Heavy Duty (HD), stair climbing hand trucks compliment the popular standard models that have a capacity ranging from 240 to 375 pounds. The HD models have a capacity up to 725 pounds and will be offered in a Universal and Folding frame design, both available with an optional 4<sup>th</sup> wheel attachment.

The HD powered stair climbing hand trucks are perfectly balanced climbing machines with two speed settings and single-step and continuous-step modes. The integrated step edge brake system provides a superior level of safety, and the greater capacity offered by the HD models means operators can transport heavier loads quickly and safely up and down stairs. From large boilers and machines to bulky rolls and tanks, the HD models are investments that will pay for themselves. Where an operator may have needed another person or two to help move heavy, bulky items in the past, they will be able to manage on their own, safely and much faster.

With the folding handle on the HD Fold model, the operator can adjust the position of the handle to balance the center of gravity of the load. This allows the operator to maintain an upright posture while maneuvering loads up and down stairs. The optional 4<sup>th</sup> wheel attachment will allow the operator to let the hand truck carry all of the weight when moving items long distances on flat, smooth surfaces.

Paul Adler, Director of Marketing, says this of the new product: "The heavy duty powered stair climbing hand truck models are going to be well received by our customers who are challenged with moving heavy, bulky items up and down stairs. Based on the success we have had with our standard models, we are very excited to add these new hand trucks to our portfolio of powered products."

#### **About Magline**

As a leader in the material handling industry, Magline, Inc. is committed to creating innovative solutions that help people transport materials more safely and efficiently. For over 70 years, this has translated to creating an exceptional product and service experience that has earned long term customer loyalty. The focus remains on creating innovative products and services, driven by our customer needs and industry insights. Magline's industry knowledge and expertise has evolved into the creation of a compelling customer value proposition.
